

DESCRIPTION

Manvert Citrus is a liquid mixture of complexed trace elements.

FEATURES

Manvert Citrus is recommended to prevent and correct zinc and manganese deficiencies in all crops, especially citrus fruit, vines, olive, vegetable and industrial crops.

Manvert Citrus increases the chlorophyll production as both zinc and manganese are involved in its formation of the same, also stimulates the plant growth and increases the protein production.

REMARKS

Manvert Citrus is compatible with most commonly used pesticide products. Do not mix with mineral oils.

Mix order : 1st Water, 2nd **Manvert Citrus**, 3rd Pesticide.

Manvert Citrus does not block filters and nozzles, leaving no sediment and due to its special formulation helps to reduce the spray water pH, improving the treatments efficacy in case of water pH above 7.

CHEMICAL COMPOSITION

Manganese (Mn) water soluble : 4,0% w/w (5,1% w/v)

Zinc (Zn) water soluble and complexed: 3,0% w/w (3,9% w/v)

Complexing Agent: Lignosulphonic Acid

APPLICATIONS ET USE RECOMMANDATIONS

Manvert Citrus can be used to all kind of crops, mainly in the most sensible to the lack of this element. It can be applied both by foliar spray and through irrigation system.

Manvert Citrus should be applied from sprouting and when the crop shows deficiency symptoms

Foliar application 200-400 cc/hl. Drip irrigation application 10-12 l/Ha splitted all over the crop cycle.
